

Exclusivity Redefined

Premium Slabs & Sintered Stone for Modern Architecture

WWW.TERRAVERDE.IN

Welcome To Terraverde Surfaces

TERRAVERDE SURFACES is a Manufacturer and Exporter of premium slabs, sintered stone, architectural surfaces and granite for modern construction and interior design.

Backed by more than four decades of industrial expertise, we combine deep knowledge of natural stone, advanced surface technology to deliver reliable solutions for architects, designers, developers, and distributors.

Our approach is clear and purpose-driven:
We don't just supply surfaces—we solve challenges.
By combining superior quality with reliable, timely delivery, we provide solutions that seamlessly align with the demands of contemporary architecture.

**Built on Experience.
Designed for Today.**

OUR STORY

At TERRAVERDE, we go beyond supplying materials—we specialize in developing customized surface solutions that address the evolving needs of modern architecture.

Our expertise lies in creating premium slabs and advanced surface materials that combine design versatility with enduring performance, tailored to each project's unique requirements.

Backed by over 40 years of industry experience, our foundation is built on strong global networks, trusted partnerships, and deep export expertise—enabling us to deliver efficient, solution-oriented support across international markets

From luxury residences to large-scale commercial developments and distribution, our surfaces are thoughtfully developed to meet the precise expectations of architects, designers, developers, and distributors worldwide.

Explore Our Flooring Products

We offer a tailored portfolio of natural and engineered surface materials designed for modern architecture and interior environments.

Architectural Surfaces

Eco Friendly, Green and Sustainable
Carbon Neutral.

Curated portfolio of designer and stones for modern architectural use including facades, wall panels, public spaces, and large-scale developments

S.P.C / W.P.C

SPC (Stone Plastic Composite) and WPC (Wood Plastic Composite) are both 100% waterproof rigid-core flooring options. SPC is stronger, denser, and ideal for high-traffic areas, while WPC offers a softer, quieter, and more comfortable feel for homes.

Sintered Stone/Slabs

Advanced Engineered Surfaces

Anti-Bacterial, Anti-Fungal Food Safe
Scratch Stain and Heat resistance while maintaining a refined contemporary appearance.

Granite (Coming Soon)

Highly durable natural stone surfaces suitable for kitchens, commercial environments, flooring, and exterior architectural applications

NOMINAL SIZE OF FLOOR & WALL TILES

Designed for Residential, Commercial & Architectural Excellence

**Luxury Residential
Interiors, Vast
Commercial Spaces.**
